

POB G6 Administrator Training

March 4th-8th, 2019 [Pob Admin Lite Training 1/2 Week March 4th-6th]

“Wendia North America’s Administrative Training Course is structured, informative, and well-planned. The itinerary makes sense and the expectations that are set on day one are exactly what you leave with on day five. The trainers are outstanding at understanding your specific needs and problems, and providing unique solutions to them. They are prepared to help your visions become a reality and could do so for any small, medium, or corporate business. Their hands-on training is nothing short of first rate.

Furthermore, sharing this experience with other organizations allows you to grow as a system administrator. Relationships are built with the Wendia staff and fellow trainees which creates a level of POB support that does not deteriorate over time.

Wendia creates a terrific family atmosphere. Not only do they specialize in training but they also specialize in building a professional network of families. Wendia exemplifies the true meaning of the phrase; the customer comes first.”

Thomas C. Coleman Jr., IT Service Center Supervisor and POB G6 System Administrator, Hurley Medical
